

Assignment 4

1) Does ANSI recognize the data type DATE?

Yes, ANSI (American National Standards Institute) recognizes the data type DATE for storing dates in the Gregorian calendar.

=====

2) Which sub-division of SQL is used to insert values in tables?

You don't need a specific sub-division of SQL to insert values into tables. There's a dedicated statement for this purpose within core SQL.

The statement used for inserting data into tables is:

INSERT INTO

This statement allows you to specify the target table and the values to be inserted into its columns.

=====
